

the eccentrically mounted cam and wherein at least the bowstring cable provides a compound effect.

39. A compound archery bow as set forth in claim 38 and wherein both the bowstring cable and the return cable provide a compound effect.

40. An eccentrically mounted cam for use in a compound archery bow, a bowstring cable attached to the eccentrically mounted cam which is let-out from the eccentrically mounted cam, return cable attached to the eccentrically mounted cam which is let out from the eccentrically mounted cam and wherein at least the bowstring cable provides a compound effect.

41. An eccentrically mounted cam for use in a compound archery bow as set forth in claim 40 and wherein both the bowstring cable and the return cable provide a compound effect.

REMARKS

It is respectfully urged that pending claims 35 to 41 are patentable over the prior art and in condition for allowance.

Respectfully submitted,

A handwritten signature in cursive script that reads "Milton Wolson".
